PERGAMON

Computers & Structures

An International Journal

Editors

K. J. Bathe
M.I.T., Cambridge
MA, USA

B. H. V. Topping
Heriot-Watt University
Edinburgh, UK

Editorial Advisory Board

N. Akkas
Middle East Technical University, Ankara, Turkey

S. N. Atluri
Georgia Institute of Technology, Atlanta, USA

I. Babuska
University of Texas, Austin, USA

J. L. Batoz
University of Technologie Compiegne, Compiegne, France

T. Belytschko
Northwestern University, Evanston, USA

N. Bicanic
University of Glasgow, Glasgow, UK

R. de Borst
Delft University of Technology, Delft, The Netherlands

F. Brezzi
Palazzo del Universita, Pavia, Italy

M. Bucalem
Escola Politecnica da Universidade, Sao Paulo, Brazil

J. W. Bull
University of Newcastle upon Tyne, Newcastle upon Tyne, UK

Gangdong Cheng
Dalian University of Technology, Dalian, China

Y. K. Cheung
University of Hong Kong, Hong Kong

C. Cinquini
Univerita degli Studi di Pavia, Pavia, Italy

M. Crisfield
Imperial College, London, UK

C. S. Desai
University of Arizona, Arizona, USA

E. N. Dvorkin
Fundacion pars el Desarrollo Technologio, Buenos Aires, Argentina

D. Frangopol
University of Colorado at Boulder, Boulder, USA

W. E. Habashi
Concordia University, Montreal, Canada

P. Hajela
Rensselaer Polytechnic University, Troy, USA

E. Hinton
University College of Wales, Swansea, UK

T. J. R. Hughes
Stanford University, Stanford, USA

A. Kaveh
Institut fur Allgemeine Mechanik, Vienna, Austria

M. Kawahara
Chuo University, Tokyo, Japan

M. Kleiber
Polish Academy of Sciences, Warsaw, Poland

W. K. Liu
Northwestern University, Evanston, USA

H. A. Mang
Technical University of Vienna, Vienna, Austria

J. L. Meek
University of Queensland, Queensland, Australia

U. Meissner
Technishe Hochshule Darmstadt, Darmstadt, Germany

C. A. Mota Soares
The Technical University of Lisbon, Lisboa, Portugal

Z. Mroz
Polish Academy of Sciences, Warsaw, Poland

A. K. Noor
University of Virginia, Hampton, USA

R. Ohayon
CNAM, Paris, France

D. R. J. Owen
University of Wales, Swansea, UK

M. Papadrakakis
National Technical University, Athens, Greece

M. N. Pavlovic
Imperial College of Science and Technology, London, UK

E. Ramm
Universitat Stuttgart, Stuttgart, Germany

J. N. Reddy
Texas A&M University, Texas, USA

E. Riks
Technical University of Delft, Delft, The Netherlands

B. Schrefler
Universita di Padova, Padova, Italy

M. S. Shephard
Rensselaer Polytechnic Institute, Troy, USA

H. Stein
University of Hannover, Hannover, Germany

A. B. Templeman
University of Liverpool, Liverpool, UK

G. Thierauf
University of Essen, Essen, Germany

N. P. Weatherill
University College of Swansea, Swansea, UK

N.-E. Wiberg
Chalmers University of Technology, Goteborg, Sweden

P. Wriggers
Technische Hochshule Darmstadt, Darmstadt, Germany

W. Wunderlich
Technische Universitat Munchen, Munchen, Germany

G. Yagawa
University of Tokyo, Tokyo, Japan

Production Editor: Susan Li, e-mail: s.li@elsevier.co.uk

Publishing and Advertising Offices: Elsevier Science Regional Sales Office, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A., or Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K.

Published semi-monthly (four volumes 1997)

Annual subscription rates (1997)
Annual Institutional Subscription Rates 1997: Europe, The CIS and Japan, 5564.00 Dutch Guilders. All other countries, US$3434.00. Associated Personal Subscription rates are available on request for those whose institutions are library subscribers. Dutch Guilder prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. For orders, claims and product enquiries (no manuscript enquiries), please contact the Customer Support Department at the Regional Sales Office nearest to you: **The Americas:** Elsevier Science, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, USA [Tel: (1) 212-633-3730. Toll Free number for North American customers: 1-888 4ES-INFO. Fax: (1) 212-633-3680. E-mail: usinfo-f@elsevier.com]. **Japan:** Elsevier Science Customer Support Department, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan [Tel: (81) 3 5561-5033. Fax: (81) 3 5561-5047. E-mail: kyf04035@niftyserv.or.jp]. **Asia Pacific (excluding Japan):** Elsevier Science (Singapore) Pte Ltd, No. 1 Temasek Avenue, 17-01 Millenia Tower, Singapore 039192. [Tel: (65) 434-3727. Fax: (65) 337-2230. E-mail: asiainfo@elsevier.com.sg]. **Rest of the World:** Elsevier Science Customer Service Department, PO Box 211, 1001 AE Amsterdam, The Netherlands. [Tel: (31) 20-485-3757. Fax: (31) 20-485-3432 E-mail: nlinfo-f@elsevier.nl].

PERIODICALS POSTAGE PAID AT NEWARK, NEW JERSEY AND ADDITIONAL ENTRY POINTS. *Computers & Structures* (ISSN 0045-7949) is published semi-monthly, two issues per month January to December in four volumes, by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GE, U.K. The annual subscription in the U.S.A. is $3434. *Computers & Structures* is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, NJ 07111-1105. POSTMASTER: Please send address corrections to *Computers & Structures*, c/o Elsevier Science Regional Sales Office, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A.

LIST OF CONTENTS

NUMBER 1

	iii	Editorial
A. Selmane and **A. A. Lakis**	1	Dynamic analysis of anisotropic open cylindrical shells
M. Pastor, M. Quecedo and **O. C. Zienkiewicz**	13	A mixed displacement–pressure formulation for numerical analysis of plastic failure
J. E. Locke	25	Thermal–mechanical stress analysis of inhomogeneous antisymmetric cross-ply laminates
Dong Ku Shin	35	Large amplitude free vibration behavior of doubly curved shallow open shells with simply-supported edges
Pankaj and **N. Bićanić**	51	Detection of multiple active yield conditions for Mohr–Coulomb elasto-plasticity
O. K. Bedair	63	Analysis of stiffened plates under lateral loading using sequential quadratic programming (SQP)
M. E. Stavroulaki, G. E. Stavroulakis and **B. Leftheris**	81	Modelling prestress restoration of buildings by general purpose structural analysis and optimization software, the optimization module of MSC/NASTRAN
Y. Özçelikörs, M. H. Omurtag and **H. Demir**	93	Analysis of orthotropic plate–foundation interaction by mixed finite element formulation using Gâteaux differential
I. Takewaki	107	Efficient optimal frequency design of elastically supported distributed-parameter cantilevers
Chongbin Zhao, G. P. Steven and **Y. M. Xie**	119	Effect of initial nondesign domain on optimal topologies of structures during natural frequency optimization
A. Rogovoy and **B. Ivanov**	133	Displacement formulation of the friction conditions on the contact surface
C. P. Pantelides and **Shyh-Rong Tzan**	141	Optimal design of dynamically constrained structures
Jianguo Wang and **K. Schweizerhof**	151	Free vibration of laminated anisotropic shallow shells including transverse shear deformation by the boundary-domain element method
N. Tutuncu and **M. Ozturk**	157	Bending stresses in composite spherical shells under axisymmetric edge-loads
A. Tabiei and **G. Simitses**	165	Imperfection sensitivity of shear deformable moderately thick laminated cylindrical shells

Jaw-Ren Lin	175	Static characteristics of rotor bearing system lubricated with couple stress fluids
W. J. Watkins, D. Kennedy and F. W. Williams	185	Efficient parallel Gauss–Doolittle matrix triangulation
G. H. Lim	197	On the conveying velocity of a vibratory feeder
H. Matsunaga	205	Buckling instabilities of thick elastic plates subjected to in-plane stresses

NUMBER 2

Huiyu Xue	215	A combined finite element–Riccati transfer matrix method in frequency domain for transient structural response
Datong Song, Suhuan Chen and Xiaoniu Li	221	Selection of structural parameters for correcting frequency random errors
Hsin-Chu Chen and V. Byreddy	227	Solving plate bending problems using finite strips on networked workstations
M. Walker, T. Reiss and S. Adali	237	Multiobjective design of laminated cylindrical shells for maximum torsional and axial buckling loads
Ping Liang, Su Huan Chen and Cheng Huang	243	Moore–Penrose inverse method of topological variation of finite element systems
M. F. Green and D. Cebon	253	Dynamic interaction between heavy vehicles and highway bridges
Y. Chen	265	Assessment on pile effective lengths and their effects on design—I. Assessment
Y. Chen	287	Assessment on pile effective lengths and their effects on design—II. Practical applications
S. Tolun	313	Safety factors of beams subjected to pure bending
A. A. Yazdani, A. Gakwaya and G. Dhatt	317	*A posteriori* error estimator based on the second derivative of the displacement field for two-dimensional elastic problems
M. A. Shayanfar, A. Kheyroddin and M. S. Mirza	339	Element size effects in nonlinear analysis of reinforced concrete members
K. Kormi, D. C. Webb and W. Johnson	353	The application of the FEM to determine the response of a pretorsioned pipe cluster to static or dynamic axial impact loading
B. Fallahi	369	An enhanced computational scheme for the analysis of elastic mechanisms

D. E. Barker andS. A. Lantz 373 Automating node and element assignments on conforming four-sided sections defining a domain for mapping quadrilateral elements

Min Yu, Zhong-Sheng Liu and **Da-Jun Wang** 381 Comparison of several approximate modal methods for computing mode shape derivatives

S. S. A. Ghazi, F. A. Barki and **H. M. Safwat** 395 Free vibration analysis of penta, hepta-gonal shaped plates

Technical Notes

K. D. Pithia, S. Chen and **W. C. Lau** 409 An alternative view of building structures

L. S. Ong and **G. Lu** 413 Simply-supported plate subject to loads distributed over an arbitrarily shaped area

NUMBER 3

Y. Y. Zhu, T. Zacharia and **S. Cescotto** 417 Application of fully automatic remeshing to complex metal-forming analyses

In-Won Lee and **Gil-Ho Jung** 429 An efficient algebraic method for the computation of natural frequency and mode shape sensitivities—part I. Distinct natural frequencies

In-Won Lee and **Gil-Ho Jung** 437 An efficient algebraic method for the computation of natural frequency and mode shape sensitivities—part II. Multiple natural frequencies

R. Artan 445 The analytical calculation of circular rods of variable cross-section by the initial values method

R. M. V. Pidaparti 463 Microdamage simulation in a bone tissue using finite element analysis

B. Tabarrok and **Z. Qin** 467 Dynamic analysis of tension structures

V. Yıldırım 475 A computer program for the free vibration analysis of elastic arcs

S. K. Bose and **S. C. Das** 487 Nonlinear finite element analysis of stresses and deformations beneath rigid footings

V. A. Oven, I. W. Burgess, R. J. Plank and **A. A. Abdul Wali** 493 An analytical model for the analysis of composite beams with partial interaction

J. W. Langelaan and **E. Livne** 505 Analytic sensitivities and design oriented structural analysis for airplane fuselage shape synthesis

J. A. Masad 521 Optimization methods with structural dynamics applications

Sung-Kie Youn and **Sang-Hoon Park**	527	A study on the shape extraction process in the structural topology optimization using homogenized material
K. Vijayaraghavan and **K. S. Surana**	539	*p*-Version least-squares finite element formulation of a system of convection-reaction nonlinear equations—fixed bed *o*-xylene oxidation
Chang-New Chen	555	The two-dimensional frame model of the differential quadrature element method
Shu H. Peng and **Wenji V. Chang**	573	A compressible approach in finite element analysis of rubber–elastic materials
		Technical Note
N. G. Sarigul	595	Parametric studies on vertical boundary location in dynamic finite element analyses

NUMBER 4

Suqin Wang, R. C. Ertekin and **H. R. Riggs**	603	Computationally efficient techniques in the hydroelasticity analysis of very large floating structures
Qi-Lin Zhang and **U. Peil**	611	Random finite element analysis for stochastical responses of structures
E. C. Oguejiofor and **M. U. Hosain**	617	Numerical analysis of push-out specimens with perfobond rib connectors
R. Suresh and **S. K. Malhotra**	625	Some studies on static analysis of composite thin-walled box beam
J. H. Chang and **L. P. Pu**	635	A finite element approach for J_2 calculation in anisotropic materials
S. M. Yang and **S. M. Tsao**	643	Dynamics of a pretwisted blade under nonconstant rotating speed
E. S. B. Reddy, M. O'Reilly and **D. Chapman**	653	A software to predict the behaviour of tension piles
B. F. Song	659	A technique for computing failure probability of a structure using importance sampling
O. U. Onyemelukwe, M. A. M. Torkamani and **H. R. Bosch**	667	Numerical simulation of wind-induced forces on bridge deck sections of long-span bridges
N. Manoharan and **S. P. Dasgupta**	681	Collapse load computation for high-friction soil
Shih-Ming Yang	685	Stability analysis of linear structural control systems with noncolocated feedback

M. Rahman	691	The stress intensity factor for a circular crack in an infinitely long cylinder of an inhomogeneous material under axial loading: a simplified approach
T.-P. Chang and **M.-H. Wu**	699	On the use of characteristic orthogonal polynomials in the free vibration analysis of rectangular anisotropic plates with mixed boundaries and concentrated masses
D. Satish Kumar, C. Sujatha and **N. Ganesan**	715	Disc flexibility effects in rotor bearing systems
V. Ramamurti and **R. Karthikeyan**	721	Stress analysis of taper locks
Xiaodong Luo and **R. V. Grandhi**	737	ASTROS for reliability-based multidisciplinary structural analysis and optimization
A. N. Bercin	747	Analysis of energy flow in thick plate structures
Byung Woo Lee and **O Kaung Lim**	757	Design sensitivity analysis extended to perturbation treatment in problems of uncertain structural system
Lee Xingde	763	Temperature calculation in the thickness direction for composite of arbitrary layers
M. Serra	771	Approximated calculus of torsional rigidity of beams with solid cross-section
A. E. Anuta Jr	775	The mode shape reversal with viscous damping
		Technical Note
E. Romanelli and **P. A. A. Laura**	795	An approximate method for analyzing transverse vibrations of circular, annular plates of non-uniform thickness and a free inner boundary

NUMBER 5

F. Trochu and **Yuan-Yao Qian**	799	Nonlinear finite element simulation of superelastic shape memory alloy parts
J. Ari-Gur and **I. Elishakoff**	811	Dynamic instability of a transversely isotropic column subjected to a compression pulse
W. J. Liou	817	Impact analysis of laminated composite plates with statical indentation laws
B. B. Budkowska and **C. Szymczak**	831	Initial post-buckling behavior of piles partially embedded in soil
F. Fraternali and **G. Bilotti**	837	Nonlinear elastic stress analysis in curved composite beams

J. Atkočiūnas, A. Norkus and L. Rimkus	861	Distortion in mechanics of elastic and elastic–plastic frames
M. Isreb	865	Superheater minimum stress unit start-up option of coal-fired power plants
Jian-Jun Chen, Bao-Yan Duan and Yu-Geng Zeng	877	Study on dynamic reliability analysis of the structures with multidegree-of-freedom
D. Wang, M. R. Chowdhury and A. Haldar	883	System reliability evaluation considering strength and serviceability requirements
Ş. Yüksel and M. Gürgöze	897	On the flexural vibrations of elastic manipulators with prismatic joints
N. Siva Prasad and C. J. Rajagopal	909	Effect of node placement algorithm on adaptive mesh generation
G. Sinha and M. Mukhopadhyay	919	Static, free and forced vibration analysis of arbitrary non-uniform shells with tapered stiffeners
A. K. Soh, C. K. Soh and L. P. Pey	935	On the compatibility conditions for modeling tubular joints using different types of elements

NUMBER 6

A. A. El Damatty, R. M. Korol and F. A. Mirza	943	Large displacement extension of consistent shell element for static and dynamic analysis
M. Dicleli	961	Computer-aided optimum design of steel tubular telescopic pole structures
Hyo-Jin Kim	975	Postbuckling analysis of composite laminates with a delamination
J. M. Dickens, J. M. Nakagawa and M. J. Wittbrodt	985	A critique of mode acceleration and modal truncation augmentation methods for modal response analysis
W. J. Liou	999	Stress distributions of short fiber composite materials
A. Paolozzi and I. Peroni	1013	A procedure for the determination of effective mass sensitivities in a general tridimensional structure
A. Ergin	1025	The response behaviour of a submerged cylindrical shell using the doubly asymptotic approximation method (DAA)
Jeha Ryu, Sang-Sup Kim and Sung-Soo Kim	1035	A criterion on inclusion of stress stiffening effects in flexible multibody dynamic system simulation
B. Hučko and L. Faria	1049	Material model of metallic cellular solids

Zefang Xu and **A. Mirmiran** 1059 Looping behavior of arches using corotational finite element

P. M. Wung 1073 Laminated composite structures by continuum-based shell elements with transverse deformation
